Um. I really liked the first one, so when I saw that another game was there, I was really excited. But then I noticed that the game felt kind of rushed. I'm not dissing the creators, but I don't know if it was the mistranslated text, or some of the art, but I was a little disheartened. Next, I found that there were two endings I could figure out myself. Which is quite a shame, as the first was terrific with 20 endings and all! I thought they could've done something way different, I loved that Liza was the new main character, but in my opinion, they should have gone with a new ending of some sort. But maybe you can get a better kick out of the game than me, please, give it a try, and if you don't like it, refund it. It's only a buck, and the game lasts about thirty minutes. I'm recommending the game for this reason. -Note- To sum this up incase you don't like reading, experience this game if you liked the first, and then decide if you will refund it or keep it.. I would give a neutral review if I could. The writing of this game is attempting far too hard to be dark, it just comes off as edgy, which is a shame, as their previous game had pretty decent writing. The translation is imperfect as well, with several typos. The nail in the coffin is just how short it is combined with how slow it feels, it just isn't very fun.. fairly short but pretty nice However, please let us resize the game window.. Umm. no comment. this game already great. and with a good soundtrack YEAH GREAT. AND IT HAS A FREE DLC if you got 10/11 steam achievement well, this game is a story of Liza, yea you know from the confess my love..

EDIT FOR NEW UPDATE / DLC: Incredibly, the day after I made this review, a patch came out that addressed most of my concerns. The translation has been significantly improved, and I'd say it's perfectly passable now. It's still not perfect, but I'd say it's more on par with the translation in the previous game now. Way more coherent and easy to read. Transparent Black is a neat little gem of a game by a Chinese developer that was made for a game jam. You play as a nameless girl that is struggling to cope with the constant bullying of her classmates, and as the player you make some simple choices that determine how she will react to the ever growing anguish in her heart. I can't really say any more without spoiling it, so I'll refrain. It's quite short, clocking in at about 1 - 2 hours, depending on how clever you are or how quickly you jump into a guide. Before you decide to try this game, please make sure to go play the developer's previous title, Confess My Love, as it will add a lot of context and story that gets built upon. It's free, and despite the developer saying that Transparent Black isn't a sequel to it, it's pretty clear that Transparent Black builds on the story set up in Confess My Love, or at the very least heavily references it. The art style of the game is beautiful, depressing, and creepy. It uses minimalism well, conveying enough detail visually to make you understand exactly what's happening while giving you plenty of flat space that you're likely to project your own details onto, which further enhances the depressing atmosphere and horror of the game. The music is also perfectly fitting. In summary, this is a short but very memorable little horror game at a very cheap price that's worth your time. Just make sure you play Confess My Love first to get the full experience.
